

# Tuscan SeamClip™ placement for Multi-Width Planks: 3", 5" & 8" wide x 36" long tiles, offset.

## Calculating approximately how many SeamClips needed:

**For 3", 5" & 8" wide x 36" long plank tile you need 1.5 Tuscan SeamClips per square foot**

- Using a 3", 5" & 8" X 36" 3/8" plank tile with an offset, you should only need 3 per side, assuming your tile is nice and flat and not warped at all.
- Calculate how many tiles you need for the job, then take the number of tiles needed times 3 straps per tile. (You need 3 per side and 1 for one end, but because the tiles each share the SeamClips, you will only need 4 straps per tile.)

**MADE IN THE USA**
